Immunology and Cell Biology (2000) **78**, 655–658

Subject index

7α-hydroxylation; and dexamethasone-induced apoptosis 238

Abstracts; Annual Scientific Meeting of the Transplantation Society of Australia and New Zealand A1
acquired immune deficiency syndrome; immune responses in HIV-1-resistant sex workers 586
actin; localization of flightless I protein 423
activation; one-signal model of B cell 133
adenosine triphosphate
  coupled to cAMP generation in promyelocytic cells 467
  involvement in signalling via the $P2Y_{11}$ receptor 369
adenovirus; study of G-protein signalling using replication-deficient 375
ageing
  effects of anti-oxidant immunomodulation 49
  effects of exercise on macrophage function 545
  effects of exercise on the immune system 523
Antarctica; mucosal immunity in 616
antibody
  anti-idiotypic, selective inhibition of activated CTL 20
  IgM antisulfatide in IgM paraproteinaemia 124
  immunization against *Helicobacter pylori* in absence of (Brief Communication) 28
  kinetics of hypermutation onset 224
anti-oxidant; and immunomodulation 49
apoptosis; prevention by 7α-hydroxysteroids 238
athlete
  effects of exercise on mucosal immunity 536
  effects of exercise on systemic immunity 496
  infections in high-performance 510
ATP *see* adenosine triphosphate
autoimmunity; dendritic cells and (Review Article) 91

B cell
  activation, regulation of LPS-induced 142
  responses and the one-signal theory 133
Bacille Calmette–Guerin; modified forms of as new tuberculosis vaccines 342
bacteria, probiotic
  immune response to 55
  modulating immune responses with 67
  survival and therapeutic potential 80
Bifidobacterium spp.; survival and therapeutic potential in dairy products 80
biopsy; endomyocardial, after cardiac transplantation 272
biosensor; study of Tamm-Horsfall protein–C1q binding 474
Book reviews 89, 176, 297, 465, 571, 649
bovine leucocyte adhesion deficiency; L-selectin expression on neutrophils in 264
bursectomy; to determine site of IgA-producing cell precursors (Brief Communication) 294

Ca^{2+}; measurement in intracellular organelles 403
calcium; role of channels in retina neurotransmitter release 442
cancer
  and role of dendritic cells (Review Article) 91
  immunotherapy (Review Article) 179
carbohydrate; modification of exercise immune responses 554
CD4; expression on dendritic cells (Burnet Oration) 161
CD69; expression in flaky skin mice 596
cell cycle
  regulation of parathyroid hormone-related protein localization 395
  role of peroxisome proliferator-activated receptors in regulation of 436
channels; voltage-gated, regulation in pituitary somatotropes 356
chaperonin 10; effects of recombinant early pregnancy factor in rats 603
chemokine
  cooperativity with cytokines in the asthmatic response 415
  expression of MuMig and Crg-2 (Brief Communication) 156
  KC production in response to *Pseudomonas aeruginosa* challenge 1
c-Jun amino terminal kinase; regulation during T-cell activation (Conference Highlight) 166
cloning; of murine histidine-rich glycoprotein 280
complement 1q; binding of Tamm-Horsfall protein to 474
cornea; KC production in 1
costimulation; mechanism for in mitogenic synergy 408
culture; generation of dendritic cells in long-term 196
cyclic adenosine monophosphate; in human promyelocytic cells 467
cyclosporine A; inhibition of surface Ig-mediated signals 142
cytokine
  and granuloma formation in mycobacterial infections 334
  effects of dietary lipids on 31
  effects of exercise on expression 532
  macrophage differentiation in cultures containing 205
  production in $H2^b$ mice lymphocytes 247
  regulation of production by dendritic cells 214
cytomegalovirus; *HLA-DQB1* alleles and type I diabetes 259
cytoskeleton
  localization of flightless I protein 423
  localization of heterotrimeric G-proteins 387
  role of $p70^{S6K}$ in cell migration 447
cytotoxic T lymphocyte; inhibition in HIV-1 infection 20
cytotoxicity; effects of dietary fats 40

dehydroepiandrosterone; prevention of thymocyte apoptosis 238
demyelination; antisulfatide antibodies in IgM paraproteinaemia 124
dendritic cell
  cancer immunotherapy (Review Article) 179

immunological sentinels (Review Article) 91
in stromal-dependent cultures 196
interaction with mycobacteria 318
regulation of T cell cytokine production by 214
subtypes, origins and functions (Burnet Oration) 161
diabetes; association with *HLA-DQB1* alleles 259
diet
effects of fats on macrophage-mediated cytotoxicity 40
effects of lipids on immune system functions 31
Drosophila melanogaster; flightless I localization during embryonic development 423

E7 oncoprotein; molecular mimicry with human protein sequences 580
early pregnancy factor; and allogeneic skin graft survival time 603
endotoxic shock; immunomodulation role for anti-oxidants in 49
enzyme-linked immunosorbent assay
for whole-cell pertussis IgG 254
study of Tamm-Horsfall protein–C1q binding 474
eosinophil; migration in the asthmatic response 415
eosinophilia; and IL-6 expression during *Nippostrongylus brasiliensis* infection (Brief Communication) 646
epidemiology; of exercise immunology 485
epidermal growth factor receptor; induction of clustering by insulin 408
Erratum; Proudman SM, Cleland LG, Fusco M, Mayrhofer G, Accessible xenografts of human synovium in the subcutaneous tissues of the ears of SCID mice, 1999; 77: 109–20 (Erratum) 466
erythrocyte complex; vaccination with in mice 149
evolution; of T cell receptor constant regions 103
exercise
and infections in athletes 510
effects of overtraining on immunity and performance 502
effects on cytokine levels 532
effects on macrophage function 545
effects on mucosal immunity 536
effects on systemic immunity 496
effects on the immune system in the elderly population 523
interaction with neuropeptides and immune function 562
modification of immune responses with nutritional supplements 554
exercise immunology
epidemiology of 485
overview of 483
experimental autoimmune encephalomyelitis; prevention of progressive (Brief Communication) 641

fatty acid
effects on immune system 31
effects on macrophage-mediated cytotoxicity 40
flightless I; localization during embryonic development 423
fluorescence-activated cell sorter analysis; of dendritic cells 196

G-protein
localization of heterotrimeric 387
signal transduction linked to heterotrimeric 375
gene transfer; use of adenoviruses in 375
GHRH *see* growth hormone-releasing hormone
glycolipid; involvement in *Mycobacterium*–host relationship 301
glycoprotein; histidine-rich, cloning of murine 280
granulocyte–macrophage colony stimulating factor; *Mycobacterium avium* infection in mice lacking 118
granuloma; role of in mycobacterial infections 334
growth hormone-releasing hormone; intracellular signalling systems used by 356

H2; production of cytokines in mice of different haplotypes 247
Helicobacter pylori; therapeutic immunization against (Brief Communication) 28
histidine; murine glycoprotein rich in 280
HLA-DBQ1 allele; association with type I diabetes 259
homeostasis; Ca^{2+}, techniques to assess 403
human immunodeficiency virus-1
immune responses in resistant sex workers 586
inhibition of cytotoxic T cells activated in infection 20
human papillomavirus 16; molecular mimicry with human protein sequences 580
human peripheral blood lymphocyte; in development of toxoplasmosis models 608
hypermutation; in Ig heavy and light chains 224

immunity
effects of exercise on mucosal 536
effects of exercise on systemic 496
mucosal, in Antarctica 616
overtraining effects on 502
immunization; against *Helicobacter pylori* infection (Brief Communication) 28
immunoglobulin; effects of exercise on levels 536
immunoglobulin A
response to influenza virus challenge after vaccination 149
site of precursors for cells producing (Brief Communication) 294
immunomodulation
effects of anti-oxidants 49
effects of dietary lipids 31
immunoregulation; effects of *Trichostrongylus colubriformis* on L929 cells 575
immunosenescence; effects of exercise in the elderly population 523
immunotherapy; for cancer (Review Article) 179
importin; involvement in parathyroid hormone-related protein localization 395
infection
bacterial, and haemopoiesis in mice lacking granulocyte–macrophage colony stimulating factor 118
in high-performance athletes 510
upper respiratory, effects of exercise on 485
influenza; challenge in mice after oral vaccination 149
insulin; induction of epidermal growth factor receptor clustering 408
interferon; inducible expression of chemokines MuMig and Crg-2 (Brief Communication) 156

interferon-γ; protection against tuberculosis 325
interleukin; effects of exercise on expression 532
interleukin-1β; effects on macrophage differentiation 205
interleukin-2; frequency and rejection of Th precursors producing 272
interleukin-5; synergy with eotaxin in the asthmatic response 415
interleukin-6; expression during *Nippostrongylus brasiliensis* infection (Brief Communication) 646
interleukin-12; production by dendritic cells (Burnet Oration) 161
intestine
  effects of TGF-β from milk on 74
  site of IgA-producing cell precursors (Brief Communication) 294
isotype switch; and hypermutation in Ig heavy and light chains 224

JNK *see* c-Jun amino terminal kinase

Lactobacillus acidophilus; survival and therapeutic potential in dairy products 80
leprosy; immunopathogenesis of nerve damage 349
ligand; T-cell activation with an altered 13, 623
lipid, dietary; effects on immune system 31
lipopolysaccharide
  absence of high-dose paralysis in B-cell responses 133
  induction of B-cell activation 142
L-selectin; expression on bovine neutrophils 264
lymphadenopathy; in flaky skin mice 5
lymphocyte; modelling of migration (Theoretical Article) 288
lymphoproliferation; effects of probiotic bacteria 67

macrophage
  differentiation in cytokine-containing cultures 205
  effects of exercise on function 545
MAP kinase *see* mitogen-activated protein kinase
marsupial; T cell receptor α and β constant regions 103
microscopy
  confocal, transport of neurotrophins 430
  fluorescence, and Ca^{2+} imaging 403
migration
  model for peripheral lymphocyte (Theoretical Article) 288
  role of $p70^{S6K}$ in cell 447
milk; effects of bioactive molecules in health and disease 74
mimicry; molecular, between human papillomavirus and human proteins 580
mitogen-activated protein kinase; and T cells (Conference Highlight) 166
model; peripheral lymphocyte migration (Theoretical Article) 288
monocyte; adherence to porcine endothelial cells 633
mouse, flaky skin
  dysregulated expression of CD69 and IL-2 receptors in 596
  peripheral lymphoid compartment disruption in 5
mucosal addressin cell adhesion molecule-1; in progression of experimental autoimmune encephalomyelitis (Brief Communication) 641
mucosal system; effects of probiotic bacteria on immunity 55
multiple sclerosis; potential target for treatment of (Brief Communication) 641
mycobacteria; interaction with dendritic cells 318
Mycobacterium avium; infection in mice lacking granulocyte–macrophage colony stimulating factor 118
Mycobacterium leprae; role in leprosy nerve damage 349
Mycobacterium spp.; host relationship 301
Mycobacterium tuberculosis
  gene expression during infection 311
  new tuberculosis vaccines 342
  role of $CD8^+$ T cells in infection 325
  role of granulomas in infection 334
myocarditis; infections in high-performance athletes 510

natural killer cell; adherence to porcine endothelial cells 633
nematode; effects of *Trichostrongylus colubriformis* on L929 cells 575
nerve growth factor; transport in specialized organelles 430
neuropeptide; interaction with exercise and immune function 562
neurotransmitter; release at retina ribbon synapses 442
neurotrophin; retrograde axonal transport of from nerve terminal 430
neutrophil; expression of L-selectin on bovine 264
Nippostrongylus brasiliensis; effects on interleukin-6 expression (Brief Communication) 646
nitric oxide; production affected by dietary fats 40
nucleus
  localization of heterotrimeric G-proteins 387
  localization of parathyroid hormone-related protein 395
  localization of photosensitizers 452
nutrition; modification of exercise immune responses 554

opioid; role in exercise and immune function of endogenous 562
ovalbumin; specific TCR transgenic line 110
overtraining
  effects on immunity and performance in athletes 502
  overview of exercise immunology 483

P2Y; receptor in human promyelocytic cells 467
$P2Y_{11}$; signal transduction and white cell maturation 369
p38; mitogen-activated protein kinase signalling (Conference Highlight) 166
$p70^{S6K}$; regulation of cell motility 447
paraproteinaemia; IgM, and IgM antisulfatide antibodies 124
parathyroid hormone-related protein; nuclear and nucleolar localization of 395
peripheral lymphoid compartment; disruption in flaky skin mice 5
peroxisome proliferator-activated receptor; in tumorigenesis 436
pertussis; antibody levels in infants immunized with acellular vaccine 254
phagosome; formation in mycobacterial infection 301
photosensitizer; targeted intracellular delivery of 452
PPAR *see* peroxisome proliferator-activated receptor 436

protein kinase A; signalling by growth hormone-releasing hormone 356
Pseudomonas aeruginosa challenge; and KC production 1
psoriasis; animal model 5, 596

quenching; of high dendritic cell autofluorescence for FACS analysis 196

resistance; HIV-1-specific immune responses in HIV-1-resistant sex workers 586
retina; neurotransmitter release at ribbon synapses in 442
retrograde axonal transport; of neurotrophins 430

Schwann cell; role in leprosy nerve damage 349
severe combined immunodeficiency; mouse model of toxoplasmosis 608
signal transduction; study using adenoviruses 375
skin graft; effects of early pregnancy factor on survival time in rats 603
stress
  effects on macrophage function 545
  mucosal immunity in Antarctica 616
sulfatide; antibodies against in IgM paraproteinaemia 124
superantigen
  altered ligands demonstrate quantitative nature of T-cell activation 623
  partial T-cell activation with an altered ligand 13
surface immunoglobulin; signalling and B-cell activation 133, 142
synaptic ribbon; neurotransmitter release at in the retina 442

T cell
  activation in flaky skin mice 596
  $CD8^+$, in mycobacterial infections 325
  mitogen-activated protein kinase signalling (Conference Highlight) 166
  partial activation with an altered peptide ligand 13
  quantitative nature of activation 623
  regulation of cytokine production by dendritic cells 214
  role in leprosy nerve damage 349
  transgenic line producing ovalbumin-specific $CD8^+$ 110
T cell receptor
  characterization of an ovalbumin-specific transgenic line 110
  cloning of marsupial constant region genes 103
T helper cell; frequency and rejection of IL-2-producing precursors 272
therapy; photodynamic, and intracellular delivery of photosensitizers 452
thymocyte; dexamethasone-induced apoptosis of mouse 238
TNF-α *see* tumour necrosis factor-α
tolerance, oral
  and probiotic bacteria 55, 67
  role of bioactive molecules in milk 74
toxoplasmosis; animal model 608
transforming growth factor-β; in milk 74
translocation; by G-proteins to the cytoskeleton and nucleus 387
Trichostrongylus colubriformis; effects on TNF-α receptor expression 575
tuberculosis
  Mycobacterium tuberculosis gene expression 311
  new vaccine candidates 342
  role of granulomas in 334
tumorigenesis; role of peroxisome proliferator-activated receptors 436
tumour necrosis factor-α
  effects of *Trichostrongylus colubriformis* on receptor expression 575
  effects on adhesiveness of monocytes and NK cells 633
  effects on macrophage differentiation 205
  production affected by dietary fats 40

vaccination; oral, IgA responses after 149
vaccine
  antibody levels in infants immunized with an acellular pertussis 254
  mycobacterial infection, based on dendritic cells 318
  new tuberculosis 342
vaccinia virus; expression of chemokines after infection with (Brief Communication) 156
virulence; and gene expression of *Mycobacterium tuberculosis* 311
virus; oral vaccination with irradiated whole 149

white blood cell; maturation via extracellular ATP and the $P2Y_{11}$ receptor 369
